EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Sc	Indian Institute of Technology, Guwahati	7.21	2023-2027
Senior Secondary	JAC	88.2%	2022
Secondary	CBSE Board	89.6%	2020

PROFILE

Third-year B.Sc. (Hons.) Data Science & Artificial Intelligence student at IIT Guwahati with hands-on experience building and deploying end-to-end machine learning projects, including predictive models, NLP classifiers, recommendation systems, and RAG applications. Comfortable across the full pipeline: data cleaning, feature engineering, model building, evaluation, deployment, and AI-powered knowledge retrieval. Seeking a Data Science / Machine Learning / Generative AI internship to apply analytical and programming skills on real-world problems.

PROJECTS

- **Obsidian Vault RAG Knowledge Assistant** 2026
Python, LangChain, RAG, FastAPI, Vector Database, Streamlit GitHub
 - Built an AI-powered RAG assistant to retrieve information from Obsidian Markdown notes.
 - Implemented embeddings and vector search for accurate context-aware knowledge retrieval.
 - Developed an interactive application for real-time question answering over personal documents.
- **Car Price Prediction Model** 2026
Python, Pandas, Scikit-learn, Streamlit GitHub
 - Built a regression model to predict used-car prices from historical listing data.
 - Performed data cleaning, feature engineering, and encoding of categorical variables.
 - Evaluated multiple regression algorithms using cross-validation metrics.
 - Developed and deployed an interactive Streamlit application for real-time price prediction.
- **Spam Message Classifier** 2026
Python, NLP, TF-IDF, Multinomial Naive Bayes, Streamlit GitHub
 - Built an NLP-based text classifier to detect spam messages using TF-IDF vectorization.
 - Trained and tuned a Multinomial Naive Bayes model for strong precision on unseen messages.
 - Deployed an interactive Streamlit web application for real-time message classification.
- **Movie Recommendation System** 2026
Python, Cosine Similarity, TMDB API, Streamlit GitHub
 - Developed a content-based recommendation engine using cosine similarity on movie metadata.
 - Integrated the TMDB API to dynamically fetch posters and movie details.
 - Designed an interactive interface for users to explore similar movies based on their selection.
- **Message Emotion Detector** 2026
Python, NLP, Machine Learning, Streamlit GitHub
 - Built an NLP-based classifier to detect emotions from text messages using machine learning.
 - Applied text preprocessing and feature extraction techniques for effective emotion classification.
 - Developed an interactive Streamlit application for real-time emotion prediction from user input.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java, HTML, CSS
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-Learn, LangChain, FastAPI
- **Machine Learning & AI:** Regression, Classification, Recommendation Systems, NLP, RAG, LLMs
- **Tools:** Git, GitHub, Streamlit, Jupyter Notebook, VS Code, Vector Databases
- **Data Analytics:** Excel, Power BI, Data Visualization, EDA
- **Core Courses:** Data Structures & Algorithms, Database Management Systems, Machine Learning, Statistics, Probability, Artificial Intelligence, Data Visualization
- **Maths Courses:** Linear Algebra, Basic Calculus, Discrete Maths, Probability & Random Processes

POSITIONS OF RESPONSIBILITY

- **Captain,** Inter-School Cricket Team School Level
- **Event Host,** School Annual Program School Level
- **Volunteer,** Inter-School Competitions School Level
